PREFACE

In 1992, the Revised Illinois Uniform Crime Reporting (RIUCR) system was implemented with 118 agencies participating. This redesign has caused some obstacles in programming and in the compilation of data. To derive state and county totals, conversions were required, changing the new offense codes back to the old. More information on the conversion is discussed in the Introduction of this manual.

We will continue to work with all agencies to refine this program and welcome any input or concerns you may have in reporting requirements.

With appreciation and thanks to all who have contributed to its publication, I present Crime In Illinois 1992 to the people of Illinois.

INTRODUCTION

INTRODUCTION

The Illinois Uniform Crime Reporting Program

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The I-UCR Program has evolved into a system intended to meet the needs of all reporting agencies. It is an incident-based reporting system designed to accomplish the following major goals:

- To provide needed administrative statistics for law enforcement agencies.
- To provide the legislature with information necessary to formulate effective laws which address the crime problem.
- To provide Illinois citizens with the most complete information on the nature and extent of crime.
- To include comprehensive data for researchers and planners.
- To adhere to the national program's standards.

Reporting crime statistics is mandated by chapter 38, paragraph 206-8 of the Illinois Revised Statutes:

> 206-8. Crime Statistics. The Department (of State Police) shall be a central repository and custodian of crime statistics for the state and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.

Reporting agencies receive monthly and quarterly summaries of the reported criminal activity within their jurisdictions upon request. All offenses known to law enforcement agencies are reported monthly to the Crime Studies Section of the Bureau of Identification. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads and hospitals throughout Illinois. Agencies may also submit service code and local ordinance data in order to provide law enforcement administrators with information for use in planning and research; determining and utilizing manpower; budgeting; and developing and evaluating crime prevention programs.

On January 1, 1992, the Revised Illinois Uniform Crime Reporting (RIUCR) Program, operating under the Federal Bureau of Investigation's new National Incident Based Reporting System (NIBRS) criteria, became operational on a voluntary basis. At the end of 1992, 118 agencies had reported crime data utilizing the RIUCR system. In order to put data into a format that would allow calculation of a county, MSA and state totals, a conversion program was used to convert the more complex offense codes of the revised system data back to the old offense codes. Due to limitations placed on the conversion process by the data elements themselves, data breakouts beyond category level were not possible for some of the traditional Crime in Illinois reports. Narrative in each report section will further explain limitations where they exist.

In 1992 there were 1,007 law enforcement agencies in Illinois, of which 797 reported crime statistics directly to the Bureau of Identification. The remaining agencies reported their crime statistics through an intermediary agency (sheriff's office, police department, etc.). Agencies submit their data through the use of paper forms, computer printouts, magnetic tape, floppy disk, or via remote on-line terminals.

Chicago Police Department and Downstate Illinois Totals

The practices employed by the Chicago Police Department to report Illinois Uniform Crime data are not consistent with those used by all other reporting agencies. In order to avoid creating a misleading impression concerning statewide crime and arrest trends, statistics from the Chicago Police Department are presented separately in this publication.

The reader is advised to read carefully the footnotes in the various sections of this publication that pertain to specific Chicago Police Department reporting practices.

Sections pertaining to Crime Index Offense data indicate separate totals for the Chicago Police Department and separate totals for Downstate Illinois which consists of sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and Secretary of State's Office. Sections pertaining to Crime Index Arrest data indicate separate totals for the Chicago Police Department and separate totals for Downstate Illinois which consists of sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office. State totals have been calculated only when the inclusion of the Chicago Police Department data would not create a misleading impression concerning the statewide total. Data from 118 agencies utilizing the Revised Illinois Uniform Crime Reporting (RIUCR) Program operating under the NIBRS criteria was processed through a conversion program to accomplish the totals presented in this publication.

Considerations for Interpretation

When comparing the crime statistics of one agency with another, many factors should be taken into consideration before conclusions are made. Some of the conditions affecting the type and volume of crime are:

- Population density and degree of urbanization with size of locality and its surrounding area.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, poverty level and job availability.
- Cultural factors and educational, recreational and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).
- Citizens' attitudes toward crime.
- Crime reporting practices of citizenry.[1]

I-UCR Reporting Agencies

Since 118 agencies utilized the Revised Illinois Uniform Crime Reporting (RIUCR) Program for reporting their 1992 I-UCR data, separate Reporting Agency by Method charts are provided in this section. The first chart is a summary of all the agencies, the second chart indicates the reporting methods for agencies using the OLD I-UCR Program, and the third chart indicates the reporting methods for agencies using the RIUCR Program. Also included in this section is a listing of agencies using the RIUCR Program to report 1992 I-UCR data.

The Crime Index

The Crime Index is the total number of index offenses occurring within a given jurisdiction during a specified period of time. It is used to indicate the amount and extent of serious crimes as defined by the International Association of Chiefs of Police Committee on Uniform Crime Reports. The Crime Index consists of violent crimes - murder and nonnegligent manslaughter; forcible rape; robbery; and aggravated assault, and of property crimes - burglary; theft; motor vehicle theft; and arson.

The index crimes used by the I-UCR Program translate into the national program's eight Crime Index offenses as:

Violent Crimes

Murder and nonnegligent manslaughter - The willful killing of a person or the death of a person caused by gross negligence of an individual other than the victim.
Forcible rape - The carnal knowledge of a female, forcibly and against her will - includes attempted rape. Illinois reports criminal sexual assault offenses rather than rape offenses under this category.
Robbery - The taking or attempting to take anything of value for the care, custody, or control of a person or persons by force or threat of force or violence - includes attempted robbery.
Aggravated assault - The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death - includes aggravated battery, attempted murder and ritual mutilation.

Property Crimes

Burglary - The unlawful entry of a structure to commit a felony or theft - includes attempted burglary.
Theft - The unlawful taking or stealing of property or articles without the use of force, violence, or fraud - includes burglary from motor vehicle and attempts.
Motor vehicle theft - The unlawful taking or stealing of a motor vehicle - includes attempted motor vehicle theft.
Arson - The willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another.

The Crime Rate

The crime rate indicates the volume of crime occurring within a given population. It is defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index} \times 100{,}000}{\text{jurisdictional population}} = \text{crime rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

SECTION I

CRIME TRENDS

Violent Crimes
Property Crimes

Please note the following while reviewing this section:

The Downstate Offense Total is the sum of data reported by sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office. The Downstate Arrest Total is the sum of data reported by sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office.

The Chicago Police Department Total is the data reported only by the Chicago Police Department.

The State Offense Total is the sum of the Chicago Police Department and Downstate Illinois. State Offense Totals have been calculated only when the inclusion of the Chicago Police Department data would not create a misleading impression concerning the statewide total.

Each category of offense and arrest information reflects data for offenses that occurred between January 1, 1992, and December 31, 1992. Because of agency adjustments and late submissions, 1990 and 1991 figures reflected in this publication are not comparable with those figures published in Crime in Illinois 1991.

The 1990, 1991 and 1992 crime rates for this section were calculated using the 1990 actual decennial census. The population census statistics indicated in this section are the most recent complete population census statistics available for each year. Section IV, Crime Index/Crime Rate Data, contains a more detailed explanation.

SECTION II

Offense and Clearance Data

Since Illinois Uniform Crime Reporting practices employed by the Chicago Police Department are not consistent with those used by all other reporting agencies, this section does not contain any State totals. Two separate Offense and Clearance Trend reports are presented. The first report is for Downstate Illinois and contains data reported by sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office. Data from 118 agencies utilizing the Revised Illinois Uniform Crime Reporting (RIUCR) Program operating under the NIBRS criteria was processed through a conversion program to accomplish the totals presented in the Downstate Merged Offense and Clearance Trend report. The second report is for the Chicago Police Department. Each report includes the following:

Offenses Known to the Police - the number of offenses scored.

Offenses Actually Occurred - offenses police pursued through investigation to solution; the total offenses known to police minus unfounded offenses and offenses referred to responsible jurisdiction - used to compile the Crime Index.

Total Offenses Cleared - Cleared by Arrest-Adult, Cleared by Arrest-Juvenile, Failed to File Complaint or Prosecute-Adult, Failed to File Complaint or Prosecute-Juvenile, Other Exceptional Clearances-Adult, and Other Exceptional Clearances-Juvenile - administratively closed cases are not considered clearances.

SECTION III

Adult and Juvenile Arrest Data

Since Illinois Uniform Crime Reporting practices employed by the Chicago Police Department are not consistent with those employed by all other reporting agencies, this section contains the following tables:

(1) Downstate Illinois Adult and Juvenile Arrest Trend (agencies reporting under the old system) table includes the following which were reported by sheriff's offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office. This table reflects data reported by all of the above type agencies except the 118 agencies reporting on the revised system. In order to present as much detailed data as possible, data for agencies reporting under the old system is displayed on this report in the traditional format.

Total Adults Arrested - compiled from police dispositions of Arrested and Held for Prosecution (including Released on Bond); Summoned, Cited or Notified; Released without Charge; and Referred to Other Agency.

Total Juveniles Arrested - compiled from police dispositions of Handled within Department and Released; Summoned, Cited or Notified; Referred to Welfare Agency; Referred to Juvenile Court; Referred to Criminal or Adult Court; and Referred to Other Agency.

Total Adult and Juvenile Arrests.

(2) Downstate Illinois Adult and Juvenile Arrest Trend (merged data from agencies on both the old and new system) table includes the following which were reported by the sheriff's offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office. This table reflects the downstate total of all of the above type agencies. In order to achieve these totals, data reported by the 118 agencies reporting through the revised system was processed through a conversion process and merged with data reported under the old system at index level. For those offenses where a direct conversion of offense codes was not possible, individual offense codes will not be displayed.

Total Adults Arrested - compiled from police dispositions of Arrested and Held for Prosecution (including Released on Bond); Summoned, Cited or Notified; Released without Charge; and Referred to Other Agency.

Total Juveniles Arrested - compiled from police dispositions of Handled within Department and Released; Summoned, Cited or Notified; Referred to Welfare Agency; Referred to Juvenile Court; Referred to Criminal or Adult Court; and Referred to Other Agency.

Total Adult and Juvenile Arrests.

(3) The Chicago Police Department's Arrest Report totals shown on the following tables were compiled from the figures submitted by the Chicago Police Department. Please note that the offense categories in the following tables do not reflect I-UCR offense categories.

(a) Chicago Police Department Adult Arrests for 1991 and 1992.

(b) Chicago Police Department Juvenile Arrests for 1991 and 1992.

(c) Chicago Police Department Total Arrests for 1991 and 1992.

SECTION IV

Crime Index/Crime Rate Data

Caution should be exercised when reviewing and using these data. The many social factors related to crime and a community's residential population, used to calculate the crime rate, must be considered when making statistical comparisons. A community may have a small residential population but a large moving population because of a substantial number of manufacturers, motels, etc., within its jurisdiction. The large moving population attracts criminal behavior that occurs within the small jurisdiction and must be reported by the law enforcement agency. The crime rate calculation does not compensate for a moving population. The statistics can make it appear that crimes are committed by community residents when this is not necessarily true.

This section utilizes the most recent complete census population statistics available from the U. S. Bureau of Census. The 1991 and 1992 crime rates for this section were calculated using the actual 1990 census population statistics which were obtained from the U. S. Bureau of Census, 1990 Census of Population and Housing.

During the Illinois Uniform Crime Reporting years 1991 and 1992, there were 63 cities with I-UCR participating police departments which were located in more than one county (see appendix for list of cities and counties). In order to calculate the county crime rate, crime index total and each of the eight crime index offense totals, each of the 63 cities' crime rate, crime index total and each of the eight crime index offense totals has been proportioned based on the percentage of population residing in each county. The following is an example for calculating the crime index total:

> Naperville with a total population of 85,351 has 72,931 or 85.4 percent of its population in DuPage County and 12,420 or 14.6 percent of its population in Will County. The total crime index for Naperville in 1992 was 2,499.
>
> The crime index has been computed as follows for DuPage and Will Counties:

	County		Population	Total Crime Index
Naperville	DuPage	72,931	85,351 - .854 x 2,499 =	2,135
	Will	12,420	85,351 - .146 x 2,499 =	364
Naperville	Total	85,351		2,499

The crime index that was calculated for DuPage County, based upon the percentage of Naperville's population residing in DuPage County, has been added to the total crime index for DuPage County. The crime index that was calculated for Will County, based upon the percentage of Naperville's population residing in Will County, has been added to the total crime index for Will County.

It should be noted that each county total reflects crime data reported by police departments, sheriffs' offices, colleges and universities that are located within each county. Since the Secretary of State's Office has districts that have multi-county jurisdiction, the Secretary of State's Office totals are not reflected in the county total but are reflected in the state total.

Data from 118 agencies utilizing the Revised Illinois Uniform Crime Reporting (RIUCR) Program operating under the NIBRS criteria was processed through a conversion program to accomplish the totals presented in the Crime Index Rate Comparison Report.

There are separate Crime Index/Crime Rate comparison reports for the following:

Police Departments
Sheriffs' Offices
Colleges and Universities
Secretary of State
Counties
Illinois State Police
Hospitals
Railroads
Park Districts
Airports
Other Agencies

The Crime Index/Crime Rate Comparison State Total is an aggregate total of the sheriffs' offices, police departments, colleges, universities and the Secretary of State's Office.

Positive values in this section are not preceded by a "+" as in other sections within this publication.

Because of agency adjustments and late submissions, the 1991 figures reflected in this section are not comparable with those figures published in Crime in Illinois 1991.

MSA boundaries are as defined on October 12, 1984

Metropolitan Statistical Areas

By 1980 standards, an area qualifies for recognition as an MSA in one of two ways: (1) if it includes a city of at least 50,000 population, or (2) if it includes an urbanized area of at least 50,000 population with a total metropolitan population of at least 100,000. In addition to the county containing the main city or urbanized area, an MSA may include additional counties having strong economic and social ties to the central county.* Two of the MSAs overlap with Iowa and Missouri. Areas outside of Illinois that are included in an MSA are not represented in the statistics presented here. In some cases, the percentages may not equal 100 due to rounding.

MSA Summary

The MSA summary includes MSA Large Municipalities, MSA Small Municipalities and Rural Areas Inside MSAs. The inhabitants of the large and small municipalities and rural areas that comprise the state's MSAs account for 82.6 percent of the state population. The total MSA index crimes account for 91.9 percent of the Illinois Crime Index.

Law Enforcement Employment Information

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{number of employees} \times 1{,}000}{\text{jurisdictional population}} = \text{employment rate}$$

EXAMPLE:

A department with 60 employees in a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants:

$$\frac{60 \times 1{,}000}{51{,}000} = 1.2 \text{ per } 1{,}000 \text{ inhabitants}$$

Law enforcement employment rates should not be correlated with index crimes; non-index offenses and the many services performed by the typical law enforcement officer amount to over 80 percent of the officer's workload, the details of which usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

The 34,702 part- and full-time sworn officers in 1992 account for 79.2 percent of the entire state of Illinois law enforcement community's work force. The 1992 employment rate for sworn employees of the entire state of Illinois law enforcement work force is 3.0 per 1,000 inhabitants. The 9,100 civilian employees comprise 20.8 percent of the entire state of Illinois law enforcement community's work force, with an employment rate of .8 per 1,000 inhabitants.

The 26,597 part- and full-time sworn officers in 1992 account for 82.8 percent of the police department work force. The 1992 employment rate for sworn employees of police departments is 2.9 per 1,000 inhabitants. The 5,532 civilian employees comprise 17.2 percent of the police department work force, with an employment rate of .6 per 1,000 inhabitants.

The 3,674 part- and full-time sworn officers in 1992 account for 65.8 percent of the sheriffs' offices work force. The 1992 employment rate for sworn employees of sheriffs' offices is 1.7 per 1,000 inhabitants. The 1,912 civilian employees comprise 34.2 percent of the sheriffs' offices work force, with an employment rate of .9 per 1,000 inhabitants.
